

Proposed reorganization of the BAC image folders - 2008			
dcp 7/8/08			
Existing TMS image folders			
The decade folder structure will continue to be maintained until the included files can be renamed and moved.			
Other and rarebooks1 folders will continue to be used for images not linked to TMS objects. (TMS objectID not applicable)			
It doesn't really matter where an image is stored as long as a link to TMS is created.			
Following the folder structure guidelines allows us to group the images by logical groupings to keep the #images in a folder manageable.			
Following the folder structure guidelines will make it easier to search for images by name.			
Proposed TMS image folders			June, 2008
